Characteristics

ROBOT FANUC M-410 IHW

This palletizer has been expressly designed to increase performance in palletizing and handling applications. It has a capacity of up to 700 kg and a reach of up to 3.1 m. For this reason, the series of robots M-410 of 4 or 5 axes is ideal for handling intermediate and heavy loads. FANUC is one of the best brands in the market for what it offers security and profitability for your company.

Able to work within an optimized workspace and equipped with a large vertical path, the M-410 palletizing robot is specifically designed to stack pallets up to a height of 2 meters. The integrated base and control system on the pedestal (also available in a
