

ROLLER CONVEYOR FOR BOXES

Ref: 1156

Type

Characteristics

ROLLER CONVEYOR FOR BOXES

Roller conveyors are an industrial system dedicated to the transport, accumulation and distribution of goods between different positions within the warehouse. In addition, they also serve to connect different logistics warehouses or factories with their warehouses.

Roller conveyors save time and gain efficiency in repetitive load transfers and with circuits already laid out, by reducing the manual handling of merchandise.
